

Darach McSherry

UX/Product Designer

Belfast, Northern Ireland

[LinkedIn](#)

[Portfolio Link](#)

UX Designer with 3+ years of experience designing complex cyber security products. Strong background in end-to-end product design, design systems, and cross-functional collaboration with engineering, product, and research. Proven ability to simplify complex workflows, improve usability, and ship scalable solutions that deliver measurable business impact.

Experience

UX Designer 2

Rapid7, Belfast / Hybrid

2022 - Present

- Led end-to-end design for multiple cross-platform initiatives, from discovery through delivery, supporting thousands of enterprise users.
- Played a key role in migrating legacy interfaces to a modern design system, improving consistency, accessibility, and development velocity across products.
- Designed scalable user flows and information architecture for a unified administration experience, reducing time-to-value and simplifying customer configuration.
- Partnered closely with Product Managers and Engineers to shape roadmap decisions, validate solutions, and ship incrementally.
- Conducted competitor analysis, usability testing, and data-informed design decisions using tools such as Pendo and user feedback loops.
- Advocated for user-centred design practices across the organisation, influencing both tactical features and long-term platform strategy.

Key achievements

- Improved usability and task completion across core administrative workflows through simplified navigation and clearer information hierarchy.
- Data Modelled the entire security ecosystem, from data ingestion to case creation.
- Working closely with engineers, I helped map out a new platform access level control framework, creating a more robust access management for users and resources.

Education

- First Class Honors in BDes (Hons) Digital Design, Ulster University Belfast

Skills

Product Design

- End-to-end product design
- UX & UI design
- Interaction design
- Information architecture
- Design systems

Research & Strategy

- User research
- Usability testing
- Competitor analysis
- Service design thinking

Tools

- Figma (High fidelity prototyping)
- Miro (Collaborative whiteboarding for discovery, ideation, and mapping complex user journeys as well as Low fidelity prototyping)
- Pendo (Analytics and behavioural insights)

Collaboration

- Cross-functional teamwork
- Stakeholder management
- Design critiques
- Agile / product teams

Selected Projects

- Unified Administration - Designed a centralized administration hub that consolidated eight unique product settings areas into a single, intuitive experience, significantly improving usability and findability.
- Unified Data Collection - Led research and ideation to define a unified approach for configuring, monitoring, and managing data ingestion across 29 connectors and integrations.
- Design System Migration - Led the UX transition of Rapid7's D&R module to a modern design system, improving consistency, accessibility, and scalability across the product suite.
